Undergraduate

as a modest and tireless student I have been able to develop the way I learn and interact with others to a degree that has also helped me to mature into a better person. since childhood I have been ambitious and delighted for my study. I never give up on things that is my quality and I have been built over years hard working ,sociability ,insightful, trustworthy which are some of my characters. during my primary school I was first in my school when I was highschool and preparatory school I was one some top students and scored 9A grade 10 national examination and 527 grade 12 national examination. I am currently studying computer science at Addis Ababa University 3rd year computer science and I am still one of top students
